**Industrial Electrician; Controls Technician**

2018- **Comanley, Compressor equipment** **www**

2020 **The service engineer**

Ensuring proper technical condition of software and hardware automation systems for the smooth and trouble-free operation of automation systems of the plant,

Ensuring reliable operability of all instrumentation and automation, measuring instruments, existing alarm systems and locks emergency protection for processing facilities;

Implementation of new, modification and development of existing automation systems, process control systems, instrumentation and the enterprise on the basis of a unified concept of complex automation Implementation work on implementation of complex automation and mechanization of production processes raising the technical level of production, productivity, reduce cost, improve product quality, to ensure favourable working conditions and safety.

Taking measures to ensure the reliability and smooth operation of technological equipment, as well as participation in the development of projects

2017- **Hakim** **www** Consumer goods for hygiene

2018 **Electrical technician**

Adjustment of automation devices (sensors, controllers, network communication)

Execution of works for complete and quality systems maintenance of the site process control systems, pneumatic equipment to control the functioning of computer systems, control parameters of the electronic elements of the equipment, performing test audits for timely detection of faults and their elimination

2013- **Alugaz** **www** **Electrician**

2017

Performing preventative Maintenance and troubleshooting according to specifications, instructions of Maintenance Management.

Performing maintenance and repairs on production equipment, the building and all of its components.

Design and build electrical panels for machinery.

Design and build electrical circuits to improve the performance of equipment and machinery

Proficient in testing electrical systems and continuity of circuits in electrical wiring, equipment, and fixtures, using testing devices such as ohmmeters, voltmeters, and oscilloscopes, to ensure compatibility and safety of system.

**Education:**

2012-2017 Kazan State University of Technology and Management  
Electric power and electrical engineering Bachelor

English IELTS 5.5 (R 6.0, W 5.0, L 5.0, S 6.0)

Knowledge and Skills

Maintenance, reading electrical circuits, PLC, knowledge of electricians, knowledge of computer and programs Simatic s7

Additional Information I want to study and develop in Canada, full of hopes and ambitions, I will make every effort to achieve goals

Hobbies and Interests Snowboard, bicycles, hockey. Active life position.

Marital Status: married, 2 children (5 and 10 y.o.)

**Cover letter**

I have worked for hardware commissioning and programming companies that purchase hardware, such as Omron, Siemens, Schneider electric, phoenix contact, ABB, and Valmet.

There was a lot of work for only 3 of us, but we did our best to complete those tasks in short period of time, spending over 12 hours 6-7 days a week at work in order to achieve the best results, i learned a lot from this experience and I'm ready to put that in my future work.

I have experience working both alone and as part of a team. Extensive experience in performing repair work for a period of 1-2 months with 12 hours per days, without day-offs.

Each year, we were sent to Nizhny Novgorod and St. Petersburg for training, there we mastered PLC systems, equipment mechanics, and configuration types. We also mastered the work of servers and databases, the emergency situations Ministry system. I personally used RSLogix500, CorelDraw; currently i also learn the Allen Bradley programming language.

I constantly worked with foreign colleagues from the United States, Germany, Italy, and Turkey. English was always used and needed in my work.

I have always dreamed of moving to Canada and i will do whatever i have to do to achieve this goal. My family supports my desire to move to Canada. Now, I am ready to try to move to Canada.

I have been informed about the approximate cost and duration of the LMIA and work visa processing. My family budget allows such expenses.

I practice healthy lifestyle and keeping myself in good shape so after work I prefer to go to gym and do some exercises, it helps me to relax as well.
